Office Action Summary	Application No. 10/734,467	Applicant(s) FADER ET AL	
	Examiner George D. Spisich	Art Unit 3616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a stabilizer bar having an anti-shift collar, classified in class 280, subclass 124.106.
- II. Claims 6-13, drawn to method of thermally forming an anti-shift collar on a stabilizer bar, classified in class 29, subclass 896.91.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the anti-shift collar of Invention I, may be made by casting or any other process known in the art.

During a telephone conversation with David L. Wisz (Reg. No. 46,350) on January 23, 2006 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-5. Affirmation of this election must be made by applicant in replying to this Office action. Claims 6-13 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is unclear. Examiner is considering claim 5 to read on the embodiment of Figure 4. It is inconsistent to claim that the raised line is a further limitation of the "array of lines" in claim 4 from which claim 5 depends. It is also inconsistent to claim that the raised line is "an array of raised areas" as is claimed in claim 2 which claim 5 depends therefrom.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 496 949 (cited in Applicant's IDS).

EP '949 discloses a stabilizer bar assembly comprising a stabilizer bar (9) and an anti-shift collar (11 and 11a) formed onto the stabilizer bar. Applicant is informed that the method of forming, in the instant applicant, thermally forming, the device, is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight in this rejection.

EP '949 discloses the anti-shift collar comprises an "array" of raised spots or lines, as there are a plurality of raised portions that make up the anti-shift collar that are broadly considered "spots" or "lines". Furthermore, the anti-shift collar includes a raised line, which is one of the raised portions, extending about a circumference of the stabilizer bar.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hadano et al. (USPN 6,474,631), Adkins et al. (USPN 5,788,264), EP 1 522 433.
